

Junior Software Developer

▪ +27614440678 ▪ mfanafuthimagcaba366@gmail.com ▪ [my_portfolio](#) ▪ Durban

Summary

Innovative and highly motivated Junior Software Developer with expertise in Java, PHP, HTML, ReactJS, and the Ionic Framework. Experienced in developing, testing, and deploying web and mobile applications tailored to client and user needs. Proven track record in web application development, API integration, and database management using MySQL and phpMyAdmin. Skilled in building responsive user interfaces and modern web applications using ReactJS. Experienced in application development and academic research, including the completion of a research paper demonstrating analytical and problem-solving skills. Additionally skilled in graphic design, creating compelling visuals for digital platforms using Illustrator and Figma.

Experience

SD CREATIVES

55 Monty Naicker Rd, South Beach, Durban, 4001

Junior software developer (Internship)

Current

- At SD CREATIVES, I specialized in building custom web and mobile applications from client briefs, focusing on responsive frontend development and scalable backend architecture. We primarily worked with ReactJS and Ionic Framework on the frontend, and PHP with MySQL/phpMyAdmin on the backend.
- A key part of my role was collaborating closely with clients and teammates to brainstorm features, map out user flows, and translate ideas into functional, maintainable code. I contributed to improving application performance by optimizing database queries, reducing unnecessary re-renders in React, and implementing reusable UI components. To ensure long-term maintainability, I followed modular coding practices, documented core logic, and participated in peer code reviews.
- I also integrated RESTful APIs, enhanced UI/UX using Tailwind CSS and Bootstrap, and assisted in debugging cross-platform issues. This role sharpened my ability to work in a team-driven environment while delivering clean, efficient, and user-focused software solutions.

Best so Far

Mhlanga, South Africa

Junior software developer (In-service Training)

07/2023 01/2024

- During my in-service training at Best So Far, I worked primarily on technical support systems and internal tooling, bridging the gap between hardware infrastructure and software development. While the role involved Raspberry Pi setups and router troubleshooting, I actively contributed to lightweight web-based dashboards used to monitor device status and automate routine checks.
- On the frontend, I used HTML, CSS, and JavaScript to build simple, responsive interfaces that allowed technicians to view real-time device logs. On the backend, I worked with PHP and MySQL to log support tickets and track resolution times. I collaborated with a small team to brainstorm feature improvements, such as adding search filters and automated alerts, which reduced average issue resolution time by approximately 20%.
- To enhance performance, I minimized page load times by optimizing image assets and simplifying database queries. For maintainability, I refactored legacy script logic into reusable functions and added inline documentation for future developers. I also participated in daily stand-ups and peer reviews, ensuring consistent communication and code quality across the team.

Education

Tutor	Durban, 2025
Peer Tutoring Certificate, MUT - Completed a year-long tutoring program	Umlazi
Mangosuthu University Of Technology	2021 - 2023
Diploma in Information Technology (Software Development)	
Mangosuthu University Of Technology	01/2025 - 12/2025
Advanced Diploma in Information Technology (Software Development)	
Sibusisiwe Comp-Tech High School	Mbumbulu
Matric	2015 2019

Languages

- English Advanced
- Isizulu Advanced

Skills

- Full-stack Development (Java, PHP, HTML, CSS, Ionic, C#, FlutterFlow, React, Bootstrap Tailwind, Python) API Development & Integration (RESTful services) Database Management (MySQL, phpMyAdmin, SQL) UI/UX Design & Graphic Design

- Web Design & Optimization (WordPress, SEO)
 - IT Support & Infrastructure Maintenance (Network, Server, Hardware/Software)
 - Data Capture & Analysis
 - Technical Problem-Solving & Troubleshooting
 - Team Collaboration & Communication

Final Year Results

- ICT in Applications Development (Full-Time)
- Durban, 2025
- Umlazi

Semester One

Applications Development IV — 53% (Pass)
Computer Security IV — 78% (Pass with Distinction)
ICT Management IV — 82% (Pass with Distinction)
Research Techniques IV — 70% (Pass)
Systems Development Methodologies IV — 69% (Pass)

Semester Two

Advanced Databases IV — 57% (Pass)
Advanced Programming IV — 54% (Pass)
Information and Project Management IV — 69% (Pass)
Software Testing IV — 62% (Pass)
Systems Development Project IV — 65% (Pass)
